

## New Hampshire New Boston AFS

---

### ***Facility and Location***

New Boston Air Force Station (AFS) is a small satellite tracking station located approximately 12 miles west of Manchester. Besides satellite tracking, the base contains about 2,800 acres of woodlands used for recreational purposes such as camping, fishing, and rock climbing. From 1942 to 1958, the New Boston AFS property was used as a bombing and target range. Since 1958, the property has operated as an Air Force satellite tracking station.

### ***Media Sampled and Findings***

**Groundwater** — Prior to 2007, two samples from the closed bombing range reported no detection.

**Soil** — Prior to 2007, two samples from the closed bombing range reported no detection.

**Surface Water** — In 2010, 27 samples reported no detection. In 2007, 12 samples reported no detection.

### ***Appropriate Actions***

Not Applicable. All samples were below the EPA and DoD Preliminary Remediation Goal of 15 ppb.
